SUREFIRE SOCOM SUPPRESSOR ADAPTER INSTALLATION INSTRUCTIONS

FLASH HIDER / ADAPTERS
MUZZLE BRAKE / ADAPTERS
WARCOMP / ADAPTERS

USER MANUAL
SHIMMED SUPPRESSOR ADAPTER INSTALLATION

INCLUDED IN PACKAGING
• Suppressor Adapter
• Shim/Spacer Kit
• 3-Prong Wrench (as applies)
• User Manual
• Rocksett

REQUIRED TOOLS
• Acetone or Residue-Free Degreaser
• Cleaning Cloth/Cotton Swabs
• Brass Brush
• 1/2" Torque Driver (min. 20 ft lbs)
• M16 Wrench (as needed)
• 36mm Wrench (SFMB-50)

INSTALLATION INSTRUCTIONS

\\WARNING\\
ALWAYS confirm weapon is unloaded and on SAFE before attempting installation.

Note: The process below is critical to ensure proper installation and function of all suppressor adapters that require shims and/or spacers. To properly time the indexing tab on the adapter to bottom dead center (BDC) position, a combination of shims may be required. Chamfered spacer shown in Figure 1, if included, must be used for proper alignment. Always face the chamfered side of the spacer toward the barrel when timing on a barrel with 90-degree shoulder behind threads (refer to Figure 4A).

1. Referring to host weapon user manual, remove existing flash hider/muzzle brake, spacers, shims and/or washers from host weapon (Figure 2). DO NOT reuse the shims, spacers or washers removed from host weapon.

2. Apply acetone/degreaser to the muzzle threads of host weapon barrel. Use cleaning cloth and/or brass brush to remove debris and residue from threads. Additionally, apply acetone/degreaser on cotton swab to clean the internal threads of adapter. Rocksett will not adhere to threads if surface is not dry and stripped clean of debris and residue (Figure 3).

3. Refer to TIMING WHEEL CHARTS on pages 5-10 for appropriate shim stack recommendation.
DRY FIT RECOMMENDATIONS FOR BEST TIMING

4. Install the proper shim stack and spacer, if necessary, by following Figure 4 below.  
   Note: Refer to Figure 4A when timing an adapter on the shoulder. Alternately, when timing on the muzzle of the barrel (Figure 4B), drop the appropriate shims into adapter and ensure that the shims lie flat. Point the muzzle of the weapon down before fastening the adapter with inserted shims.  
   Note: For best fit, always sandwich the thinnest shim in between thicker shims.

A - SHIM ON SHOULDER

B - SHIM ON END OF BARREL

![Diagram of B - SHIM ON END OF BARREL]

5. Install the adapter onto the barrel and tighten by hand. Verify that indexing tab is at 5:30 position, approximately 15-degrees from BDC.

6. Torque the adapter between 20 - 30 lb·ft (2.77 to 4.15 metric kilograms).  
   Note: Use a torque wrench and open-ended crow’s foot, M16 wrench or 3-pronged adapter wrench.

7. If the dry fit timing position is correct at BDC (i.e. 6:00) position, remove adapter, shim stack and spacer. Proceed to the next step. If proper timing is not correct, remove the adapter; add or subtract necessary shims until proper position at BDC (i.e. 6:00) is achieved. Remove adapter, shim stack and spacer and proceed to next step.

8. Apply a thin coat of Rocksett on to adapter threads and barrel threads.  
   To review material safety data sheet for Rocksett, go to: www.flexbar.com/PDF/MSDS-Certs/ROCKSETT%20MSDS.pdf

9. Repeat steps 4-6 to reinstall the shim stack and adapter.

10. Allow Rocksett to cure for 24 hours before firing host weapon.

WARCOMP-556 DIRECTIONAL CLOCKING

![Diagram of WARCOMP-556 DIRECTIONAL CLOCKING]

Note: Suppressor locates on indexing tab, which may no longer be at BDC. Clocking of suppressor does not reduce performance of weapon system.
TIMING WHEEL
FOR 28 THREADS PER INCH

WARRANTY
SureFire warrants our suppressors and suppressor related products to be free from defects in workmanship and materials for the lifetime of the original owner. We will repair, replace, or refund your original purchase price of a product if it is determined by SureFire to be defective. This warranty does not cover normal wear and tear, damage to the suppressor resulting in whole or in part from unauthorized repairs, unstable or non-SAAMI/NATO specification ammunition, abuse, misuse, or neglect. Unwarranted repairs to the suppressor, including but not limited to core rebuilds, made necessary by any of these factors will be invoiced to the owner who will be given the right to approve such work before it commences. BSD’s and BFA’s are designed to be used with blank ammunition only. Any damage due to live fired rounds is not covered by this warranty and cannot be repaired. SureFire assumes no responsibility whatsoever and will honor no claims for damages, regardless of nature, for physical injury or property damage resulting from careless and/or irresponsible handling, adjustments to the suppressor and/or suppressor related products, neglect or abuse.

DISCLAIMER
The above warranties are exclusive, and to the extent permitted by applicable laws, shall be in lieu of all other warranties, expressed or implied, including, without limitation, any warranty of merchantability or fitness for a particular use or purpose. SureFire disclaims any and all liability for product malfunctions, physical injuries, or property damage that result in whole, or in part, from the criminal, negligent, or improper use of the product: and/or from modifications or alterations thereto. In no event shall SureFire be liable for any incidental, special, or consequential damages relating to the purchase, use, or performance of any SureFire product.

WARRANTY CLAIMS
For repair or replacement email Technical Support at technicalsupport@surefire.com or contact Customer Service at 800-828-8809 (toll free) or 714-545-9444 and obtain a Return Merchandise Authorization number (RMA#). An initial request for RMA can also be submitted through the link on www.surefire.com. You may be supplied with additional shipping instructions specific to the product being returned. Package the unit carefully and in accordance with all instructions then return to the mailing address provided (no CODs please). SureFire will pay any reasonable shipping costs to return the unit to you. ©2019 SureFire, LLC. All rights reserved.
