DESCRIPTION

The SureFire M952V provides both white light and infrared illumination powered by two 123A batteries. Select the appropriate spectrum for the situation at hand by simply rotating the bezel. The rugged M952V features an American Defense Manufacturing (ADM) AD-SF mount designed for mounting quickly and securely to a weapon rail. The M-AD-SF features the ADM patented QD Auto Lock™ Lever system for both in and out of spec rail systems. The light is activated via a DS07 switch assembly, which includes a click-on/off pushbutton switch, a system-disable feature, and a ST07 plug-in momentary-on remote switch with seven-inch cable. The integrated pushbutton and remote switch assemblies operate independently, providing switch redundancy. Constructed of lightweight aerospace aluminum, with a Mil-Spec Hard Anodized finish, and O-ring sealed to keep out the elements, the tough M952V will endure combat-like conditions without any sacrifice in weapon maneuverability.

FEATURES

- Virtually indestructible infrared / white LEDs are regulated to maximize light output and runtime
- On-the-fly switching between IR mode and white-light — no IR filter required
- TIR lens shapes versatile beam with enough reach and surround light for medium- to longer-range operations
- Hard Anodized aluminum body, tempered window & O-ring seals make light rugged and durable
- DS07 waterproof switch assembly includes a system-disable feature, a click-on/off pushbutton switch, and an ST07 switch assembly with a 7" plug-in momentary-on remote tape switch
- Quick disconnect ADM throw lever mount attaches quickly & securely to any MIL-STD-1913 rail
