

BORE ALIGNMENT RODS

SUREFIRE ALIGNMENT TOOL

SPECIFIC CALIBER

PRECISION MACHINED

FAST-ATTACH*

COMBAT PROVEN

STAY ON TARGET

HEAT TREATED STAINLESS STEEL

DESCRIPTION

The SureFire Bore Rods are intended for checking concentricity prior to firing suppressed on a new platform. The rod most closely represents the bullet flight path and will show any issue of alignment, if present. Recommended to verify barrel to adapter to suppressor alignment, for any new build or any previously unshot setup. Simply insert rod through the mounted suppressor of an unloaded weapon. Equal space should be seen between bore of suppressor and centered rod.

FEATURES

- Precision machined rods for most accurate verification
- For validation of set-up prior to first round fired
- Made in the USA
