

# SF RYDER™ 9M-TI

MODULAR SOUND SUPPRESSOR FOR 9mm PISTOLS & RIFLES with 1/2 x 28 or M13.5 x 1 LH THREADS

## DESCRIPTION

SF Modular Ryder direct-thread suppressors are built to the same exacting standards as our battle-proven Fast-Attach® SOCOM suppressors. The SF RYDER 9M-Ti suppressor—for 9mm pistols and rifles—features an ultra-light titanium tube, front plate, and rear plate that help minimize weight with no sacrifice in strength. Inside the suppressor are durable heat-treated, stainless steel baffles that are indexed and numbered for easy disassembly and reassembly for cleaning. This model allows for the end-user to remove a 2” module from the front portion of the suppressor to reduce overall length. Simply reinstall the end plate on the now-shorter option and the suppressor is ready for use. Patented pig-nose baffles precisely direct gases from fired rounds for superior sound attenuation and reduced muzzle blast, while built-in spacers help reduce carbon buildup, which can adversely affect performance of a suppressor. A tough, Cerakote™ finish—available in two colors—helps protect the durable 9M-Ti, which comes in models that fit 9mm weapons with 1/2 x 28 or M13.5 x 1 threaded barrels.

## FEATURES

- Ultra-lightweight titanium construction, rounded ends & fluted body reduce weight with no sacrifice in strength
- Patented pig-nose stainless steel baffles are durable and provide superior sound attenuation and reduced muzzle blast
- Built-in spacers help reduce carbon buildup between baffles
- Baffles are numbered and indexed for ease of reassembly
- Easy removal of 2” modular section allows for shorter overall length of suppressor when needed
- Included assembly/disassembly tool for easy baffle removal
- Additional pistons sold separately
